### Description of necessary first aid measures

- Eye** : If contact with the eye(s) occurs, wash with copious amounts of water, holding eyelids(s) open. Continue flushing for at least 15 minutes. Take care not to rinse contaminated water into the non-affected eye. If irritation develops and persists, seek medical attention.
- Inhalation** : Remove the source of contamination or move the victim to fresh air. Seek medical attention if symptoms occur.
- Ingestion** : Do NOT induce vomiting. Immediately wash out mouth with water. Get medical attention if symptoms occur.
- Skin** : Remove contaminated clothing. Wash gently and thoroughly with water and non-abrasive soap. Ensure contaminated clothing is washed before re-use or discard. If irritation develops, seek medical attention.
- Notes to physician** : Treat symptomatically with supportive care.

## 5. FIRE FIGHTING MEASURES

---

- Extinguishing Media** : Carbon dioxide, foam or dry chemical. Do NOT use water jets. Use water spray to cool fire exposed containers.
- Specific Hazards** : Combustible C2 liquid.  
Fire-exposed container may rupture/explode.
- Hazards From Combustion Products** : Under fire conditions this product may emit toxic and/or irritating fumes including oxides of carbon.
- Precautions in Connection with Fire** : Self-Contained Breathing Apparatus (S.C.B.A) and full protective firefighting clothing.

---

## 6. ACCIDENTAL RELEASE MEASURES

---

Remove all sources of ignition. Increase ventilation. Evacuate all unnecessary personnel. Wear full protective equipment and clothing to minimise exposure. If possible, contain the spill. Place inert, non-combustible, absorbent material onto spillage. Use clean non-sparking tools to collect the material and place into a suitable labelled container.

Dispose of in accordance with State, Local Government, EPA or related Regulations or Codes of Practice. If large quantities of this material enter the waterways contact the Environmental Protection Authority, or your local Waste Management Authority

## 7. HANDLING AND STORAGE

- Handling** : Repeated or prolonged contact with this material should be avoided in order to lessen the possibility of skin disorders. It is essential that all who come into contact with this material maintain high standards of personal hygiene i.e. washing hands prior to eating, drinking or going to the toilet. Build-up of mists in the working atmosphere must be prevented. Misuse of empty containers can be hazardous. Do not cut, weld, heat or drill containers. Residue may ignite with explosive violence if heated sufficiently. Do not pressurise or expose to open flame or heat. Keep container closed and bung in place.
- Storage** : Combustible C2 liquid for storage and handling purposes. Store in a cool, dry, well-ventilated area, out of direct sunlight. Avoid sparks, flames, and other ignition sources. Store away from incompatible materials such as materials that support combustion (oxidising materials). Reference should be made to Australian Standard AS1940- The storage and handling of flammable and combustible liquids. Store in original packaging as approved by manufacturer or regulatory direction.

## 8. EXPOSURE CONTROLS, PERSONAL PROTECTION

- Exposure Limits** : An exposure standard has been established for this material:  
**OIL MIST, REFINED, MINERAL TWA 5mg/m<sup>3</sup>**  
by Safe Work Australia.  
This applies only when the oil is released to air as a fine spray and is not expected to occur under ordinary conditions of use.
- Respiratory Protection** : If engineering controls are not effective in controlling airborne exposure then respiratory protective equipment should be used suitable for protecting against airborne contaminants. Final choice of appropriate breathing protection is dependent upon actual concentrations and the type of breathing protection required will vary according to individual circumstances. Expert advice may be required to make this decision. Reference should be made to Australian Standards AS/NZS 1715, selection. Use and maintenance of Respiratory Protective Devices; and AS/NZS 1716, Respiratory Protective Devices.
- Eye Protection** : Safety glasses with side shields, goggles or full-face shield is recommended. Final choice of appropriate eye/face protection will vary according to individual circumstances i.e. methods of handling or engineering controls and according to risk assessments undertaken. Eye protection should conform with Australian/New Zealand Standard AS/NZS 1337 – Personal Eye Protection Part 1: Eye and Face Protectors for Industrial Applications.

## 8. EXPOSURE CONTROLS, PERSONAL PROTECTION (Continued)

- Hand Protection** : Wear gloves of impervious material. Final choice of appropriate gloves will vary according to individual circumstances i.e. methods of handling or according to risk assessments undertaken. Reference should be made to AS/NZS 2161.1: Occupational protective gloves - Selection, use and maintenance.
- Body Protection** : Wear appropriate clothing including chemical resistant apron where clothing is likely to be contaminated. It is advisable that a local supplier of personal protective clothing is consulted regarding the choice of material.
- Engineering Controls** : Natural ventilation should be sufficient, however where vapours or mists are generated the use of a local exhaust ventilation system (drawing spray or mists away from workers breathing zone) is recommended.
